

INTEGRA 11 mm

heel safe entrance mat with carpet inserts

Integra 11 heel safe entrance mat provides remarkable dirt and moisture removal and elegant appearance together with its interlocking tiles and high performance carpet inserts. Integra 11 mm is ideal in areas where visual attractiveness is expected.

Heavy duty entrance mat is specially designed for entranceways with high density foot traffic, such as airports, subway stations, shops, shopping centres, hotels, offices, hospitals and schools. Integra 11 mm is performing best when used indoors or in weather protected areas.

High heel safe construction and open grid design allows fluid and small debris to pass through the openings keeping the surface dry and clean. The tile's textile surface scrapes shoes clean and provides a safe, slip resistant walking surface.

INTEGRA 11 mm heel safe entrance mat with carpet inserts

Easy to assemble

Integra 11 mm heavy duty, interlocking modular tiles can easily be configured for standard and custom shaped areas. The modular design allows the Integra 11 mm tiles to be cut to shape and size onsite for easy assembly without the use of special tools or equipment. To extend the mat, simply connect on more modules. Interlocking modular tiles allow you to create an entrance mat of any length and width with the minimum of waste.

Easy to maintain

Integra 11 mm entrance mat is easy to clean with the standard commercial vacuuming. Daily soiling can be dealt with using a suction vacuum cleaner or rotating brush head vacuum to remove particles from the surface of the mat. The open construction allows dirt and moisture to fall through the mat into the matwell below. This can then be removed by rolling up the mat and cleaning out the matwell.

Combo 11 mm tile is fully compatible with the Integra 11 carpet tile and together they provide effective and elegant entrance areas.

An open, heel proof construction provides plenty of storage capacity for wet and dry soil. Removed dirt particles and moisture can fall through the openings keeping surface dry and clean.

SPECIFICATIONS:	
Tile material:	UV-resistant vinyl/NBR. Resists most chemicals and oils.
Tile size:	36,9 x 20,3 cm
Packaging:	14 tiles / pkg (= 1,05 m ²)
Height:	11 mm
Weight:	7,4 kg / m ²
Tile colour:	Dark grey, black
Insert pile material:	100 % polyamide
Insert colours:	Black, grey and red
Temperature resistance:	-35°C - +70°C
